▶ **Scholarships available!**

Student experiences and success stories:

I've always known Finnish education is good and that it has been ranked as the best education in the world. Also, I've always loved Finnish culture because I've been traveling here since I was young. That is why I wanted to come to study in Finland

CATHERINE
India

Before coming to Finland, I was thinking that there will be skyscrapers, high tech innovations, international study, and working environment and I found all this to be true except for the skyscrapers.

ANIL
Pakistan

It will be a great experience and you won't regret your decision because both, the education system and other things here are really good and you will like it.

ADITYA
India

Here in Finland, the government helps its people. Childcare is a priority, they help low-income earners. The system is well structured and works fine. I feel happy here, I matter. I feel relevant.
