

# International UAS Exam: Identification

## Spring 2024

You have to identify yourself to be able to participate in the International UAS exam and proceed in the International UAS Exam selection process.

The identification process consists of two phases:

### 1. Pre-identification (before the exam)

Before the exam, you have to conduct pre-identification in Candour ID mobile application within an indicated time limit. You will receive an invitation to pre-identification to the email address provided on your application form on 11 March 2024 at the latest. Pre-identification has to be completed on **14 March 2024 at 15:00 Finnish time (UTC/GMT+2) at the latest**. The email will be sent only once so please make sure that you have space in your inbox. If necessary, also check your spam and other folders.

Another option to conduct pre-identification, within the time limit indicated above, is via the following link: <https://login.uasexam.fi/> (The page will be activated when the pre-identification begins). When logging in, please submit the same passport/identity card number and the PIN code as provided in your Studyinfo application.

### 2. Identification on the exam day

Those applicants who have successfully conducted pre-identification will be invited to the exam. On the exam day, you have to identify yourself again while logging in to the exam.

You need the following for identifying yourself:

- Passport or biometric EU/EEA identity card. The passport/identity card has to be valid until 21 March 2024.
- A mobile phone on which you can download the Candour ID mobile application.
- Candour ID mobile application (available in App Store or Google Play). Make sure you have the latest version of the application installed.

For the identification process, you have to submit the following information on the Studyinfo application form:

- The number of the passport or biometric EU/EEA identity card.
- Also, a copy of the said passport/identity card has to be attached to the application form on 24 January 2024 at 15:00 Finnish time (UTC/GMT+2) at the latest.

For the applicant to be able to identify themselves for the International UAS exam and proceed in the International UAS Exam selection process, the number of the passport/identity card submitted to the application form has to be the same as the number of the document attached to the application. The universities of applied sciences may modify the information submitted to the

application form for the purposes of identification if the information is incorrect and/or mutually contradictory.

### Completing the pre-identification on 11-14 March 2024

The pre-identification has to be completed on **14 March 2024 at 15:00 Finnish time (UTC/GMT+2) at the latest**. If you do not complete the pre-identification within the given timetable or the pre-identification fails, you cannot be invited to exam, and you cannot proceed in the International UAS Exam selection process.

You have to complete the following phases in the Candour ID mobile application during the pre-identification:

1. Download the Candour ID application on your mobile phone (available in App Store or Google Play). Make sure you have the latest version of the application installed. Follow the application's instructions carefully
2. Use the same passport/identity card in the Candour ID whose number was already provided in your Studyinfo application form
3. Take a picture of your passport/identity card
  - The application verifies that the number of your passport/identity card matches with the number provided in Studyinfo and that the passport/identity card is valid
  - NB: you have three attempts in this phase (ID photo)
4. Read the information of your passport/identity card
  - If you are using a biometric passport/identity card: Read the information from the chip of your passport/identity card
  - If you don't have a biometric passport or reading the chip of your biometric passport is not successful: You can proceed with optical verification (without chip reading)
  - If reading the chip of your biometric identity card is not successful: You can proceed with optical verification (without chip reading) by taking a picture of the front side of the identity card
5. Take a selfie
  - The application verifies that the person in the selfie matches the facial image read from the passport/identity card
  - NB: you have three attempts in this phase (Selfie)
6. Candour ID will inform you that the identification has been successful. Make sure to return to the browser and wait patiently until you are redirected to the International UAS Exam info page
7. If necessary, explore the Candour guide (the link will be updated later) where you can find detailed instructions

NB: If your phone does not have NFC support, the pre-identification may differ from the instructions above. Follow the instructions provided by the Candour ID application.

NB: In the Candour ID mobile application, you have a maximum of three attempts to take the picture of your passport/identity (ID photo) and three attempts to take the selfie (Selfie). If you cannot verify your identity within these attempts, the pre-identification cannot be completed and you cannot proceed in the International UAS Exam selection process.
