EDU NATION

PATHWAY TO MASTERS COURSES - OVERVIEW

English Language: Communication and Collaboration (5 ECTS)

Mode: Online, 7 weeks

This course develops students' oral communication and collaboration skills for academic and professional environments. Through discussions and presentations, students practice active listening, teamwork, and clear speech.

Learning Outcomes:

- Understand and follow real-time discussions and presentations.

- Contribute actively using academic vocabulary.

- Deliver effective oral presentations.

Assessment: Continuous assessment based on participation, assignments on Claned, and class engagement (Grading 0–5).

English Language: Thesis and Research Methods (5 ECTS)

Mode: Online, 7 weeks

Introduces academic writing and research-based essay development, emphasizing clarity, structure, and citation integrity.

Learning Outcomes:

- Academic writing fundamentals and structure.

- Develop clear thesis statements and coherent essays.

- Incorporate proper research and citation styles.

Assessment: Weekly writing tasks, thesis statement development, peer review, and a final polished academic essay.

Entrepreneurship and Working in Europe (5 ECTS)

Mode: Online, 7 weeks

Explores the labour market, business practices, and entrepreneurial opportunities within Europe. Students gain an understanding of employment regulations, professional networking, taxation, and business establishment processes.

Learning Outcomes:

- Understand European work culture and employee rights.

- Identify job opportunities and entrepreneurship pathways.

- Learn company types and taxation basics.

Assessment: Assignments, quizzes, and final project; attendance (≥50%) and academic integrity required.

Management and Leadership (5 ECTS)

Mode: Online, 7 weeks

Provides an introduction to management principles, leadership theories, and change management practices in European and international contexts.

Learning Outcomes:

- Identify effective leadership styles and strategies.
- Understand team management, change processes, and ethical leadership.
- Recognize key leadership values and trends within Europe.

Assessment: Assignments, quizzes, and a final project (Grading 0–5).

Research Methods: Quantitative & Qualitative (5 ECTS)

Mode: Online, 7 weeks

Introduces the core principles of quantitative and qualitative research, supporting students in developing skills needed for postgraduate-level work in European academic environments.

Learning Outcomes:

- Think scientifically and select suitable research methods.
- Understand quantitative and qualitative strategies.
- Conduct independent research using SPSS or NVivo.

Assessment: Portfolio (60%), Final Exam (20%), Interview (20%), 80% attendance required.

Principles of Project Management (5 ECTS)

Mode: Online, 7 weeks

The course introduces core project management concepts, organizational roles, and stakeholders, covering basic project planning, budgeting, scheduling, reporting, and communication. Practical exercises help learners understand the specific features of different project fields.

Learning Outcomes:

- Explain the core principles and concepts of project management.
- Apply project management methods in various working-life situations.
- Develop a project plan that reflects organizational context and specific needs.
- Integrate communication planning and risk management into project work.

Assessment: Assignments, quizzes, and final project, 80% attendance required.
